About Us - Company Overview

Introduction

BRAVETA is an industrial solutions company committed to delivering reliable products, technical expertise, and responsive customer support for demanding operational environments.

Our strength is built on the combination of industry knowledge, technical capability, product expertise, and customer-focused service. We work closely with customers to understand their operational requirements and challenges, enabling us to provide solutions that are practical, fit for purpose, cost efficient and aligned with their performance objectives.

BRAVETA operates beyond the traditional supplier model. We strive to become a trusted technical and business partner, supporting customers throughout the solution lifecycle—from product selection and supply to field application, performance evaluation, and continuous improvement.

Through strong partnerships, professional execution, and a commitment to long-term value creation, **BRAVETA** aims to contribute to improved productivity, efficiency, reliability, and operational performance with competitive pricing for our customers.

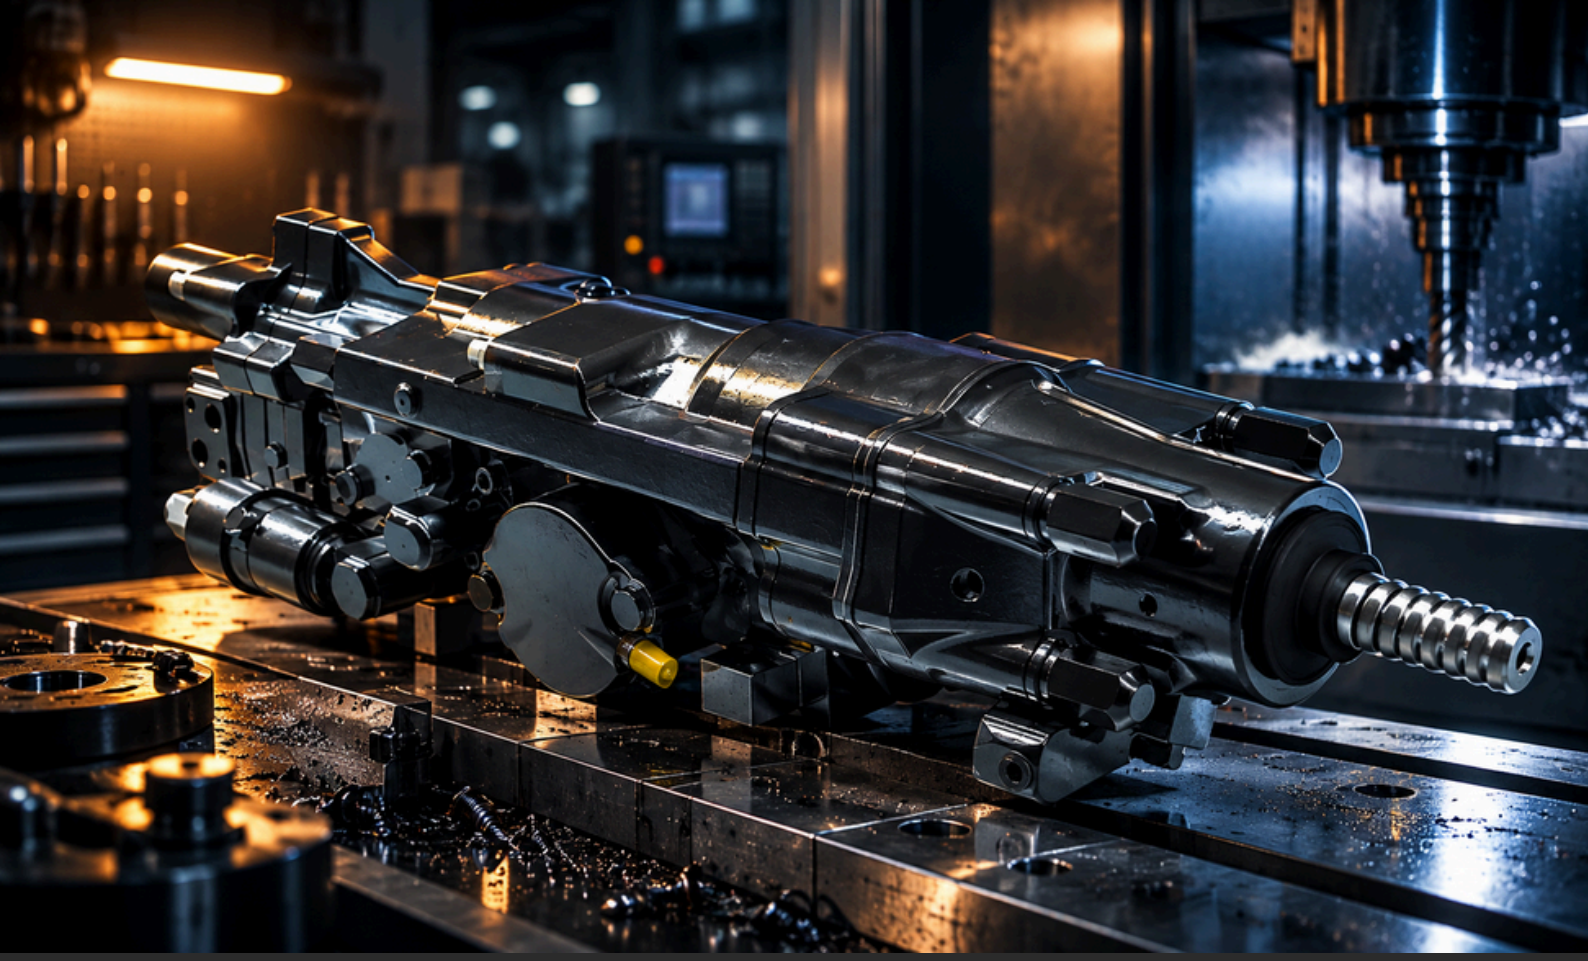

MISSION

“Become a trusted drilling partner by delivering reliable drilling support solutions that build long-term customer confidence”

VISION

“Deliver reliable industrial products and solutions by combining technical expertise, industry knowledge, and responsive customer support, while building long-term partnerships that create measurable value for our customers”

ROCKDRILL /DRIFTER Equipment

BRAVETA recognises the demands of mining and construction, where equipment reliability directly impacts productivity and safety. Using horizontal drills for vertical applications can accelerate wear, increase downtime, and lead to costly repairs.

To address these challenges, we are developing a purpose-built vertical drilling solution focused on efficient performance and reduced equipment strain.

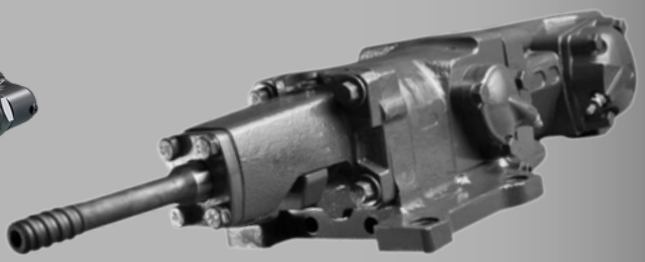

Working with experienced engineering partners, we have translated advanced engineering principles into a functional prototype, carefully built and tested to assess its efficiency and durability.

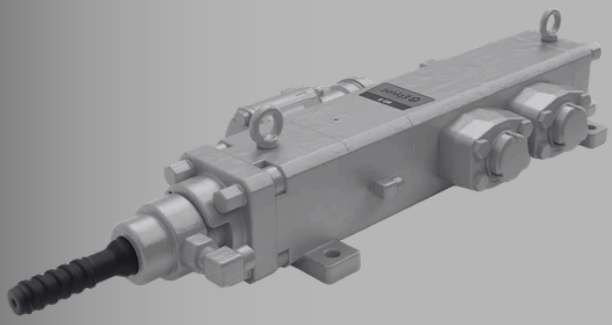

As we prepare to bring this innovation to market, our goal is clear: improve drilling performance, enhance operational safety, and create lasting value for mining companies and operators.

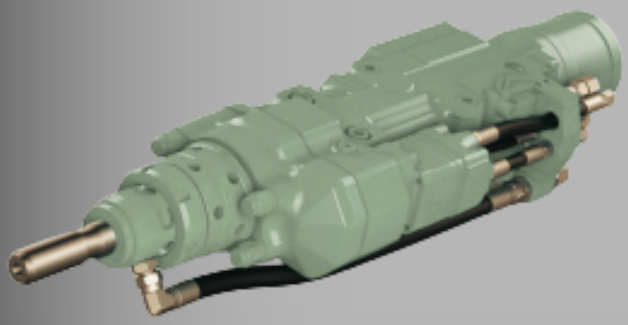

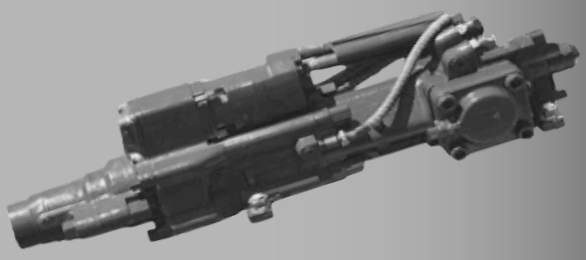

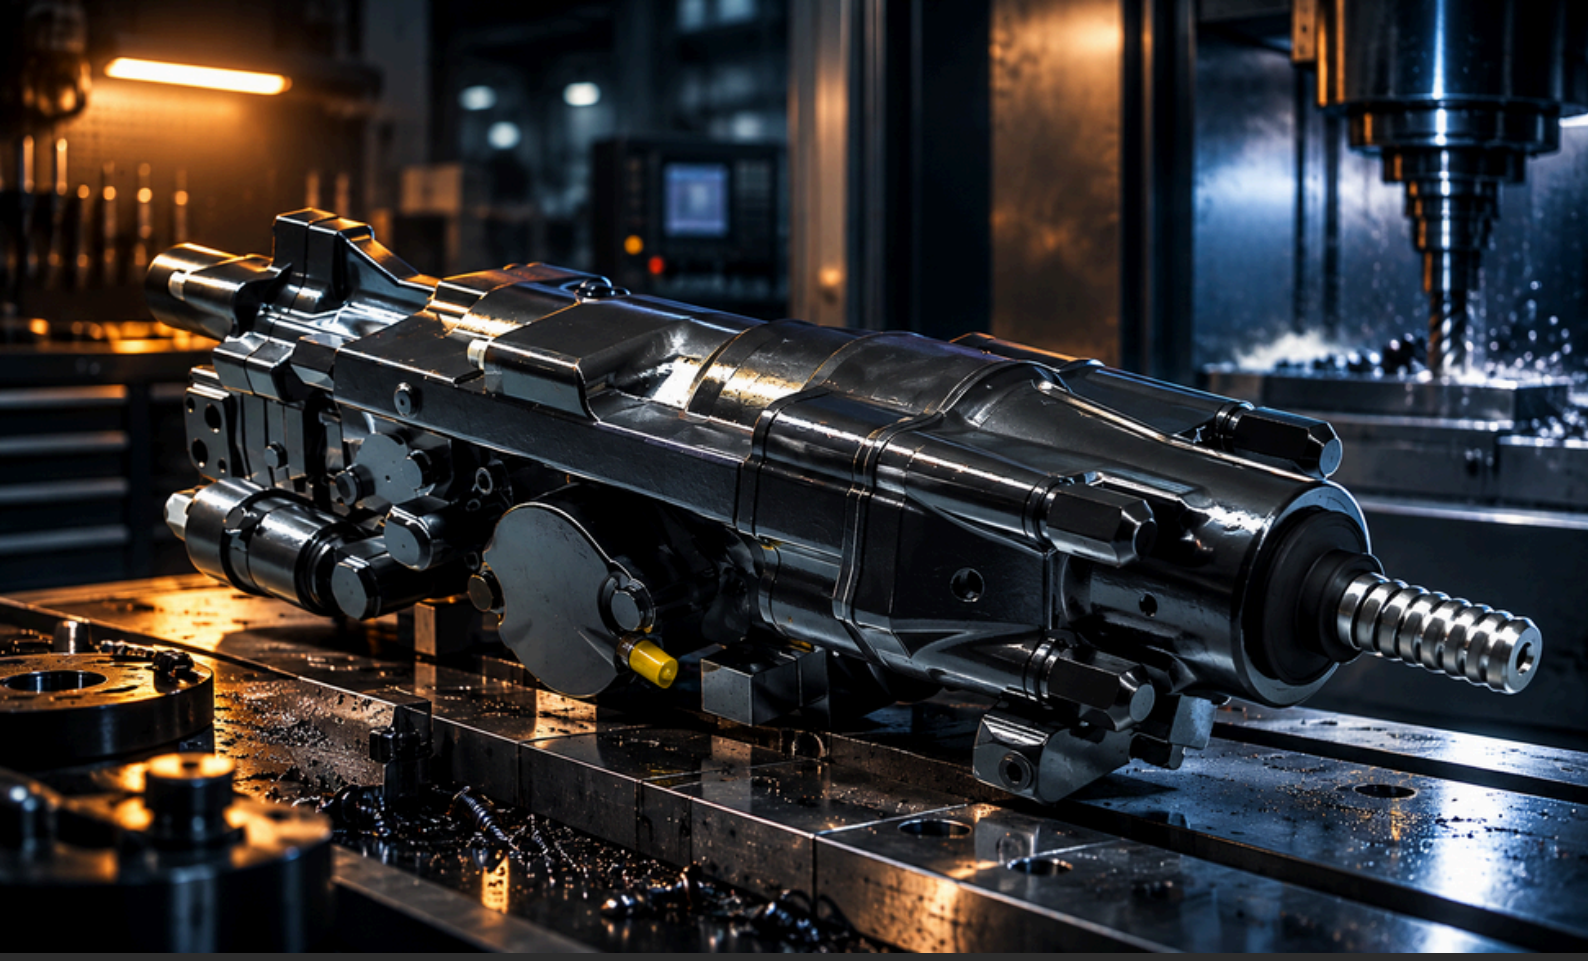

And other types are available...

ROCKDRILL Parts & Services

BRAVETA combines professional expertise and international experience to provide a comprehensive range of replacement parts for rock drilling machines. We help customers address maintenance needs, reduce costly downtime, and keep demanding operations on track.

Our range supports widely used drifter models, including COP3060MEX, COP1838HD+, RD18, HLX5, RD25, HC95, and more. From routine replacement needs to extensive repairs, we help you find the right parts to keep your equipment ready for the job.

More than a parts supplier, **BRAVETA** is your partner in equipment maintenance. With responsive service and practical product knowledge, we focus on what matters to your business: reliable equipment, productive operations, and long-term value.

Additionally, we commit to providing the same quality warranty as the original manufacturers. In addition to parts supply, we can also customize rock drill replacement solutions for our customers, providing strong support for unified management of rock drills and reducing inventory and operation costs.

ROCKDRILL Parts & Services

Drilling Machine and Maintenance Parts

BRAVETA supplies a full range of rock drilling equipment parts through integrated resources. Its products are primarily sourced from the supported factory in Jiangxi, as well as from specialized rock drilling equipment component suppliers in Australia, France, the United States, and other countries. reliability and complete interchangeability products is verified!
In addition to spare parts supply, **BRAVETA** provides customers with professional guidance on equipment operation and maintenance, fault diagnosis and repair, as well as major equipment overhauls. **BRAVETA** offers technical support throughout the entire product lifecycle.

Drilling Machine Parts and Maintenance

ROCK DRILLING TOOLS

TOPHAMMER

are manufactured by high-class material with professional process and designed to transmit intensive impact energy into the rock with the least possible loss of energy. The result is good rock breakage, high penetration rates and high productivity. This, together with optimal hole quality, great reliability and long service life, gives the best possible blasting results, outstanding drill-steel economy and low total cost.

DTH

Includes Down-the-hole hammers, drill bits and drill string . Combining advanced materials technology with skillful design focusing on performance, simplicity and endurance, our DTH tools give high productivity, great reliability and low operating costs.All process in house result in one of the best reliability ranged from 76mm to 1830mm bit diameter.

ROTARY

we are supplying rotary pipe, Shock absorb, Deck Bushing and Adapters which produced in Jiangxi Factory. The Drill String is using the highest quality tool joints (4145H) with optional tubes (ST52/A016B/4130) to meet different requirement. We are using friction welding and heat treatment process for tools joint as well as special welding to optimize the service life of tube and tool joint.

DOWN THE HOLE HAMMER & BIT

Hammer 4", 5",6" and 8"
Bit 4 1/4" - 10"
DHD340A, QL50, QL60, QL80

TRICONES & CLAW BITS

OD: 5 5/8" - 16"

ROTARY & DTH DRILL PIPES
